

Spring 2018

North Hampshire Medical Fund

Update

*One of our first patients to benefit
from the Plus OPTIX Auto Refractor*

Over £450,000 raised for medical equipment in 2017

2017 was one of the best ever for the Medical Fund. We spent £458K on 10 pieces of equipment, ranging in price from £4k to £93K.

In addition we added 84 new 200 Club members, taking us to 335, and nine new 500 Business Club members joined, taking the total to 17. Could I possibly ask for your help once again to find another 50 new members?

We held 13 events, half of which were new and all were successful. Two were entirely due to the generosity of the Balding family – the evening at Parkhouse Stables was very well attended and a huge success, as was the Cross Country Ride. We will be in their magnificent marquee again on Saturday 28th July, with a panel of high-profile racing and sporting personnel being interviewed. These events are made possible by many people giving up their valuable time and I thank them all very much for their energy, enthusiasm and generosity.

We also had a very successful year with our applications to Charitable Trusts, nearly half our income came from these.

Maggie Heath retired as a Trustee, her fundraising ideas know no bounds and her energy and efficiency is legendary. I am thrilled that she is still helping us and has a handful of new events in the pipeline. Thank you, Maggie.

Sadly Judith left us in January to pursue pastures new; she did a wonderful job as our Fund Manager, and has left us with a really great team who continue to carry on our important work.

We look forward to 2018 and beyond with confidence, as our message continues to spread. Supporting us and our ability to buy cutting edge equipment for the hard working and dedicated consultants is a major factor that allows our local hospital to continue to thrive.

Thank you all,
William Magill, Chairman

**North Hampshire
Medical Fund**

Registered
Charity No. 282094

Our highlights from 2017

Our events from 2017 contributed to 37% of our total amount raised. The other 63% was made up from general donations, charitable trusts, legacies/in memory donations, 200 and 500 Club membership, sponsored events, community collections and recovery of Gift Aid.

Events

Bridge Teas – £3,541

Following the success of our first Bridge afternoon at Ashe Park last Spring, we held another last Autumn in Baughurst. There was a delightful afternoon tea to enjoy and a raffle whilst supporters played bridge.

The Two Smoking Barrels Clay Pigeon Shoot – £5,796

Our first charity shoot was well supported and hosted by Frobury Farm Sporting Club. This year's Clay Pigeon Shoot will be on Sunday 15th April.

Classic Car Rally – £21,243

Forty-three drivers set off from Farleigh House in Farleigh Wallop, visiting some of Hampshire's most treasured sites such as Highclere Castle and Laverstoke Park Farm. The event will be making a comeback on 13th May.

Hampshire Garden Festival – £10,070

Set in the most beautiful of locations – Bere Mill on the banks of the treasured Test at Whitchurch – the festival was a perfect day out for families and friends, promoting the fun of the great outdoors and all it has to offer. Take a look at www.hampshiregardenfestival.co.uk for information on this year's festival which is being held on Sunday 10th June.

Dummer Golf Day – £10,123

Our Golf Day at Dummer Golf Club started off with a champagne breakfast, followed by the tournament and ending with a delicious lunch and a raffle. This annual event will be next held on 13th June.

Hospital Bed Push – £2,950

Teams of six raced against the clock in fancy dress to push their bed around the perimeter of Basingstoke Hospital. A group of Physiotherapists were the fastest team for the second year running and won a meal, kindly donated by the Apollo Hotel.

Total money raised in 2017: £458,000

Private View of the Mary Rose Museum & Dinner on HMS Victory – £13,419

Drinks and canapés were served to supporters as they wandered around the prestigious Mary Rose Museum before sitting down to a delicious three course dinner on HMS Victory.

Drinks and a Private View of Park House Stables – £21,032

Last Summer, the Balding Family kindly hosted a private view of Park House Stables. Afternoon Tea was served before guests watched a parade of the horses followed by a tour of the stables. Drinks and canapés were served in the evening during an auction.

London South Tough Mudder Half – £3,847

Sixteen supporters participated in an endurance event series of five miles of mud and 13 challenging obstacles to support the North Hampshire Medical Fund. The team used all the energy they had and completed the course covered from head to toe in mud – they are truly inspirational!

Cycle Sportive – £9,823

We held our second Cycle Sportive last September, starting at Inhurst Farm in Baughurst. Two-hundred riders attended and chose to ride 12, 40 or 80 miles. On their return, they were awarded a shiny medal, a hog roast, and magnificent coffee from CaféPod to refuel.

Pop Up Charity Shop, Whitchurch – £1,281

We were lucky enough to receive an abundance of donations of designer and quality high street clothing and accessories last year, which we sold for a week in October at Rotations Charity Shop in Whitchurch.

Wine Dinner at Highclere Stud – £70,802

A fabulous wine dinner was held at Highclere Stud, and with the generous pledges of our supporters, successfully raised enough money to buy new technology to help treat cancer of the liver. There was live music from the Troubadours and the wines were presented by David Roberts MW, one of 354 Masters of Wine in the world.

Cross Country Fun Ride – £7,419

Our first ever Cross Country Fun Ride was a tremendous success with a turnout of over 300 riders. This was a very special event as competitors were able to ride across the beautiful Watership Down and adjoining farm land as well as the Lloyd Webber's Estate.

37% of the money raised is from our events

Our highlights from 2017

What we bought

iSimulate for A&E - £10,020

The lightness and simplicity of ALSi makes it ideal for in-situ training. ALSi allows simulation and scenario-based education with an incredibly realistic platform to be delivered quickly, easily and intuitively. It is a hyper-flexible patient monitor simulator which uses two iPads connected wirelessly. The system includes an AED, a sophisticated multi-parameter patient monitor and defibrillator that can all be simulated using an iPad.

MyoMaps Software for MRI Scanner for Hepatology - £45,136

This software will be used by two departments. In cardiology, it allows more detailed non-invasive cardiac assessment, and in liver surgery it will allow the Trust to take part in HepaT1ca, a research project. This is looking at the ability of liver MRI to predict liver health in a non-invasive fashion, to allow a more accurate preoperative assessment of the individual patient & ultimately reduce the risk of liver surgery.

Training Defibrillator for A&E - £3,999

Immediate Life Support (ILS) is a mandatory annual study day for emergency department nurses. Places on ILS days are limited and staff often face a long wait for training. With the right equipment, ILS study days could be run in-house to ensure all staff maintain compliance and competence. The same is true of Paediatric life support courses that are also a mandatory annual requirement for ED staff.

Mini Laparoscopy Instruments for Gynaecology - £26,148

Mini laparoscopy uses 2mm-3mm mini instruments and ports instead of the conventional 5mm and 10mm, which enable our hospital to offer mini laparoscopic services. It reduces post-operative pain, minimises the risk of hernia formation and improves the cosmetic result. It will improve the quality and range of services offered, attracting more referrals and more income for our trust.

Ambulatory Urodynamics Machine for Gynaecology - £10,300

Ambulatory urodynamics uses a small hand held device. For a test period, the patient with symptoms including incontinence, urgency etc. can continue normal activities while easily recording any events that occur. The device is proven to include more physiological bladder function and reduce false positive results seen during conventional urodynamics.

Total
equipment
bought in
2017:
£458,000

Three Obstetric Ultrasound Machines for Maternity - £116,671

Three top of the range ultrasound machines, including 3D and 4D probes, were purchased for Basingstoke, Winchester and Andover. The sonographer can have a 4D view of the baby and also undertake the required extra three cardiac views (set by Public Health England). It also enables better detection of abnormalities, allowing for more timely action to combat these.

Endobronchial Ultrasound Scope for Respiratory - £46,710

We purchased an Endobronchial Ultrasound with one bronchoscope in 2015 for more effective treatment of lung cancer. We've now purchased an additional scope to reduce the risk of running a service with only one bronchoscope, particularly if the device fails to operate during a procedure.

Interventional Radiology Ultrasound Machine for Radiology - £48,425

A new ultrasound machine with highly advanced software packages to undertake state-of-the-art procedures. This benefits the department by allowing physicians to treat previously untreatable patients, with safer and more accurate treatment whilst reducing pressure on CT waiting lists. With this machine, it means that physicians can treat tumours that cannot be seen on CT scans or MRI scans.

Ultra-widefield Fundus Camera for Ophthalmology - £84,879

This is a significant upgrade on the existing camera, allowing an ultra-widefield view of the retina in a single picture. A 200° field of view of the retina is visible, without dilating eye drops, which is up to 82% of the retina in a single photo compared to the existing camera's 30° field of view. It also allows complex diagnostic imaging, while the accompanying software allows image manipulation to aid diagnosis. Images may be viewed on eight PCs simultaneously so that staff may work at the same time.

Micropulse Yellow Wavelength Retinal Laser for Ophthalmology - £65,995

Yellow wavelength lasers are a new development in the treatment of retinal diseases, and hold many advantages over the traditional green wavelength lasers used in the majority of eye units in the UK. They penetrate the tissues of the eye, including through cataracts, to where they are effective at the retina. This wavelength laser works therapeutically on the retinal tissues, but critically does not cause as much damage as green lasers.

2018 Fundraising Equipment List

For Gynaecology, Urogynaecology General Surgery and Urology

State-of-the-art Laparoscopic Simulator and Mobile Camera/Monitor System

There is nothing like this in the UK. Current simulators have significant limitations. This is state-of-the-art, innovative and the future answer to training surgeons in laparoscopic surgery. This equipment allows the surgeon to perform parts of an operation and then rest if fatigued. It allows the surgeon to perform the same tasks over and over again, improving fine motor skills. It allows the surgeon to make mistakes, learn from their mistakes and then continue without causing any damage to a patient.

£18,923

For Critical Care Point-of-Care Ultrasound

The Point-of-Care Ultrasound has unique software capabilities that allow non-invasive assessment of the function of the heart over time, allowing treatments to be tailored to the individual patient's response. It will enable Basingstoke Hospital to lead the region in its intensive care ultrasound capabilities and attract trainees who increasingly wish to add ultrasound to their skill-mix.

£38,700

For Child Health

Newborn Screening Hearing Equipment

There are two stages for the hearing pathway which traditionally has involved two different pieces of equipment being used. Some of the machines at Basingstoke Hospital are now 12+ years old and require replacement. New technology means that both hearing tests can be undertaken using a single machine. Using a single machine is beneficial to the baby (reduced examination time) and to the operator (reduced patient data entry error).

£14,490
for 3 Machines

For Radiology

Nuclear Medicine SPECT/CT

The sole gamma camera at Basingstoke Hospital uses technology that is obsolete with a limited range of examinations. At seven years older than the expected lifespan, this service will cease completely if not replaced. This will be catastrophic for many services and there will be a significant financial impact as patients will be sent to other organisations.

A SPECT/CT incorporates a gamma camera with a CT scanner (low dose CT tube). These two types of scans are fused together to give a 3D image. The anatomy as well as the functionality of body systems can be studied, offering increased sensitivity and anomaly detection for a more accurate and detailed diagnosis.

£865,000
We will be contributing £100,000
towards the total cost

For Urology

Mini-Nephroscope Set

A Mini-Nephroscope is used to perform percutaneous nephrolithotomy (PCNL) for large kidney stones. This advanced scope will improve comfort to patients as it is narrower than the current kit used in main theatre and there will be reduced blood loss during the procedure. It will also improve image quality so it is easier for the surgeon to operate the scope and view the kidney and stone location. Another benefit is that a shorter hospital stay post-operatively is required (median one day versus three days). The equipment will be used at both Basingstoke & North Hampshire Hospital and Royal Hampshire County Hospital.

£7,963

For the Lung Function Laboratory

Transcutaneous CO2 Monitor

The transcutaneous carbon dioxide monitor allows continuous non-invasive measurement of oxygen and carbon dioxide levels for long periods of time, negating the need for repeated invasive blood gases. It is a heated sensor which attaches to the patients' ear and measures the blood gases through diffusion. This piece of equipment will also monitor patients' blood gases during sleep to see whether ventilator settings and oxygen titration is set at an optimum level, allowing patients to go home quicker with non-invasive ventilation (NIV). This will allow the patient to be managed remotely, from home, requiring less hospital visits.

£9,394

For Breast Surgery

Cytori Celbrush

Lipomodelling (fat transfer/lipofilling) represents an excellent option for revising scars and cosmetic defects, improving symmetry and maximising patient satisfaction and quality of life. Increasingly, we will begin to offer fat transfer of larger volumes, potentially even for whole breast reconstruction. The process is time-consuming by nature; however equipment such as the BodyJet system aims to reduce this. The Cytori Celbrush is a re-usable, autoclavable stainless steel surgical instrument, which enables the precise delivery of micro-droplets when fat cells are injected during lipomodelling.

£3,276
for 3 instruments

Intrabeam Intraoperative Radiotherapy

Intraoperative radiotherapy (IORT) is where the patient is given a single dose of radiotherapy during their operation for breast cancer. This negates the need for a 3-5 week course of radiotherapy treatment post-operation for suitable patients. The Intrabeam is cutting edge technology; Hampshire Hospitals Foundation Trust will be one of only two district hospitals in the UK able to offer intra-operative radiotherapy and intra-operative sentinel node analysis (OSNA) simultaneously; effectively this is one-stop surgery and radiotherapy, as a day case procedure.

£45,000

**Total cost of monies needed to
be raised for innovative equipment: £237,746**

These figures are only quotes for the equipment and may increase at time of purchase.

North Hampshire Medical Fund

The charity buying tomorrow's equipment today

The 200 Club was launched in 2012 and currently has 300+ members.

Members pledge an annual amount of £200 by standing order, the equivalent of £3.85 a week. As a member, you will have the opportunity to see first-hand how the equipment is helping to improve treatment and save lives. We also have launched a 200 Club prize draw where members are automatically entered each month. Previous prizes have included a Fortnum & Mason hamper and a dinner for four at Bel & The Dragon.

We would love you to join us. To do so, please contact the fundraising office on 01256 314759 or medicalfund@hhft.nhs.uk

The 500 Club

North Hampshire Medical Fund

The charity buying tomorrow's equipment today

The 500 Club working in partnership with local businesses.

The 500 Club works in the same way as the 200 Club. Businesses donate to us £500 per year, and receive a number of benefits in return, including:

- Free advertising in our newsletters, which have a distribution of over 3,000 readers
- Free advertising on our screen in the private Candover Clinic within Basingstoke Hospital
- A link on our website to your company's website

**If you have a business, we would love to hear from you.
 Please contact the fundraising office for more information on
 01256 314759 or medicalfund@hhft.nhs.uk**

500 club members

The Champion Group

Whether you are looking for some access scaffolding, or looking for someone to make the home of your dreams a reality, The Champion Group of Companies offers a complete one-stop 'shop' for building works of any description and size. Our team of qualified operatives offers an integrated range of building services, including brickwork, property refurbishment, tool hire and site development.

Finch Commercial Insurance Brokers

Finch Group can provide you with the answers to all your business insurance needs. Whether you are a large corporate or a small growing business, we offer comprehensive commercial insurance to give you peace of mind to trade effectively and efficiently. And, as a fully FCA regulated company, you can be sure that your best interests are at the heart of all the decisions and advice.

Taylor Tripp

Taylor Tripp specialises in the landscape design and management of residential country properties throughout the UK and abroad. We value long term relationships with our clients. Every project is unique, ranging in size and complexity. The results are harmonious gardens with atmosphere and a strong sense of place that express the personality and aspirations of the client.

TAYLOR TRIPP
 LANDSCAPE DESIGN

R.W. Armstrong

R W Armstrong is a family firm with over 60 years of experience working on the finest properties in the South of England. Our traditional ethos and expert craftsmanship have been built up over four generations. We specialise in the new build and refurbishment of high-end country homes, as well as period town houses and listed properties.

Kingsclere Training Stables

Kingsclere is undoubtedly one of the best equipped and most beautiful private training establishments in the world. At Kingsclere we train racehorses belonging to private owners as well as syndicates and corporate owners. We are equipped with some of the best racehorse training facilities in the country and have experienced and committed stable staff, which enables us to take on horses of varying ages and abilities.

Cheam School

Cheam School is one of the oldest Prep Schools in the country with its origins in the 17th century. Set in 100 acres of glorious countryside, it is the perfect school for children 3-13+ to spend their early school days. We aim to develop a caring community where everyone feels respected, valued and motivated to thrive; so that the children leave us confident and responsible.

Knight Frank

Knight Frank is an established and recognised brand, selling some of the best properties in the country since 1896. Its long-standing offices in Basingstoke and Winchester sell houses throughout Hampshire and Berkshire. Knight Frank generously sponsored the Hampshire Garden Festival in 2016 and 2017.

DScribe Ltd

DScribe is a specialist provider of digital dictation solutions, outsourced transcription and speech recognition to the NHS. Specialising in large-scale, rapid production and turnaround of clinical letters. The workflow is managed using bespoke software designed by Dscribe. For the average NHS Trust, annual reductions of £2 million + can be achieved with an improved service to patients and GPs.

Investec Wealth & Investment Ltd

Originally sited in Farnham, the office relocated to Guildford in 2011 and there

has been a representative office in this part of Surrey for over 25 years. We are now 20 strong, comprising nine investment managers and a financial planner, and collectively over 150 years of investment experience. We offer discretionary investment management and financial planning for individuals, charities, pensions, trusts and companies.

Watership Property Ltd

We are an established property search and acquisition company, providing a bespoke and highly confidential service to our clients. We specialise in the Hampshire, Berks, Wilts and South Oxfordshire country house markets but also specialise in properties on the St George's Hill and Wentworth Estates. We work solely for the buyer and in their best interests to access the best in class 'off market' properties.

Reality HR

Business driven | People focused

If you're an SME, you may spend more time than you'd like on

activities that take you away from your core business. We enable you to enjoy the benefits of a dedicated HR team without the need to recruit your own. We don't believe that one solution fits all, so you can choose to outsource all or part of your HR to us, with a dedicated HR Consultant and an HR Advisor always on hand to help.

L. Hunt & Sons Ltd

L. Hunt & Sons is a successful family-run haulage company, and has been a part of the Basingstoke community for 120 years. L. Hunt & Sons helped us by transporting 20 beds from Swindon to Basingstoke for our Bed Push. We are so grateful for their support!

Morse Webb Architects

We are a long-established RIBA Chartered architectural practice specialising in the design of uniquely crafted country homes, extensions and renovations. Based in North Hampshire, we consistently secure planning consents across the region, particularly for Listed Buildings set within Conservation Areas and Areas of Outstanding Natural Beauty. We work with warm, natural materials and the finest craftsmanship to create elegant, timeless homes.

Spafax

Spafax is the inventor and manufacturer of the world's best-selling range of unbreakable commercial vehicle mirrors, engineered for longevity and guaranteed against lens breakage for ten years.

Alitex Ltd

With over 60 years of experience, we build more than beautiful aluminium greenhouses and conservatories; we create unique spaces where plants thrive, and more importantly, people flourish. From large bespoke projects to our official National Trust partnership, all Alitex structures are built with the finest quality aluminium for a beautiful and long-lasting finish.

Isoenergy

Isoenergy is the UK's most experienced installer

of renewable energy systems. The employee-owned company is expert in designing and installing ground source heat pump systems and other renewable energy technologies into hard-to-heat homes. By taking energy from the local environment, Isoenergy can help you to move away from fossil fuels, saving you money and reducing your carbon footprint.

Tylers Consultancy Ltd

Tylers Consultancy are Cost Consultants (Quantity Surveyors) and Project Managers and we provide professional advice and services, specialising in the high-end residential sector. We also cover other construction sectors such as commercial, leisure and education. We pride ourselves on providing a first-class, friendly, reliable and prompt service to our clients.

We're happy to have helped...

Ultra-widefield Fundus Camera, Ophthalmology Department

Varuni Gunasekera, Clinical Lead of Ophthalmology, [right] said: "I would like to express my sincere, heartfelt gratitude to the North Hampshire Medical Fund for raising the funds to purchase a widefield camera for the Ophthalmology department. It will make a great difference to the way we work and benefit many of our patients and hopefully make coming to the eye department less onerous. I am so grateful for all the hard work of all those involved."

Lee Heywood, Ophthalmic Photographer, [left] said: "Due to the Optos's imaging capability of scanning 82% of the retina in a single capture, it provides eye care practitioners with information that helps early detection of disorders and diseases in the retina such as glaucoma, diabetic retinopathy, hypertension and certain cancers. Thus helping save sight and save lives."

MyoMaps Software for MRI Scanner, Hepatology Department

Surgeons working at Hampshire Hospitals NHS Foundation Trust have become the first in the country to use new technology to help them treat cancer of the liver. Mr Myrddin Rees, Consultant Liver Surgeon, said: "Until now, the opportunity to extend surgery to more patients with primary and secondary tumours in the liver has been thwarted by our inability to accurately judge how the portion of the liver left in place will react. This new technology offers an exciting opportunity to fill this gap in our knowledge and will enable more patients to undergo this potentially life-saving operation."

Mr Rees added: "I'd like to say a big thank you to everybody who supports the North Hampshire Medical Fund and attended the Wine Dinner at Highclere Stud in 2017 for enabling us to buy this equipment, which will make a real difference to the lives of many patients."

Ambulatory Urodynamics Machine, Gynaecology Department

Professor Christian Phillips, head of the Pelvic Floor Centre at Hampshire Hospitals Foundation Trust has said: "We would like to say a big thank you to the North Hampshire Medical Fund for raising the money to purchase this 'state-of-the-art' Ambulatory Urodynamics Equipment. This small portable device, which is the same size as a mobile phone, can allow women to have complex bladder function tests performed whilst they go about their usual activities. Previously these tests could only be performed by equipment the size of a washing machine!"

We are the only hospital in the south outside of London to be able to provide this service, which will hugely benefit our patients and those referred from other hospitals to our tertiary centre. Without the help of the Medical Fund, this would not have been possible."

Photo: Rose Cole, HCA, Lorraine Rush, Urogynaecology Nurse Specialist (holding the device) & Professor Christian Phillips, Consultant Gynaecologist, showing the new equipment whilst standing next to the old Urodynamics Machine.

NEWS

Phil Gordon raises over £4k from Marathon

Phil Gordon ran The St George's Marathon in Dover last year, raising the astonishing amount of **£4,290.75** for the North Hampshire Medical Fund. The race was a 3.8 mile loop along the white cliffs with seven loops to make it to the finish line. Phil finished with an amazing time of 3 hours, 48 minutes and 36 seconds. On behalf of the patients and staff at Basingstoke Hospital, we cannot thank Phil enough and we are so proud of his incredible efforts. Every penny will make a difference by enabling us to buy much-needed equipment for the Hospital.

Charity Champions

Champion Group, a Basingstoke-based company specialising in building and related activities chose to support the North Hampshire Medical Fund in 2017 by making us their Charity of the Year. Throughout the year they organised dress-down days, cake sales and other fundraising events to help enable us to buy cutting-edge equipment for Basingstoke & North Hampshire Hospital.

With their amazing efforts, they have been able to raise **£4,924.22** – this figure does not include the **£3k donated by Newbury Real Ale Festival** in thanks for Champion Group's support of the event.

Basingstoke Half Marathon

Pablo Herrera and Aoife Kenny, Two Respiratory Nurses from Basingstoke Hospital, ran the Basingstoke Half Marathon last year and raised **over £700**. We cannot thank them enough for their amazing support!

Harry's 150 Mile Bike Ride

On 1st July 2017, Senior Respiratory Physiologist Harry Griffin cycled 150 miles, linking up all the different hospitals and healthcare centres where Respiratory consultants care for patients with lung disease. **Over £5,000** was raised and this money will be spent on purchasing advanced medical equipment, helping patients in Hampshire with lung disease benefit from a lung function department that can now be paralleled with the country's most prestigious hospitals.

London Marathon 2018

We are thrilled to announce that Danielle Millar will be running the London Marathon this year in aid of the North Hampshire Medical Fund.

Help Danielle reach her target of £1,400 by visiting:
<https://uk.virginmoneygiving.com/DanielleMillar>.

Jack and the Basingstalk

Oh yes they did! This year's Hospital Pantomime performed by staff from Hampshire Hospitals raised **just under £4,000** which was split between the North Hampshire Medical Fund, the Ark Cancer Charity and the Pink Place. We cannot thank everyone involved enough for their hard work and dedication - you're all stars!

Coast 2 Coast

In September last year, Pauline Jones completed the Rat Race Adventure Sports Coast 2 Coast Challenge in aid of the North Hampshire Medical Fund. Pauline ran, cycled and kayaked 105 miles across the Scottish Highlands in two days, raising **almost £700**. We are so grateful for Pauline's support.

Data Protection

In line with new General Data Protection Regulations (GDPR) coming into effect in May 2018, we need your permission to continue to communicate with you. These communications include exclusive invitations to events, notifications of presentations & general updates.

Please complete the Opt In card enclosed and return to us. Without your renewed permission we will no longer be able to email you information. Thank you in advance for your support.

How can you help?

How you can make a difference

Join the 200 or 500 Club: Contact the office or download the form from our website to become a 200 or 500 Club member. 200 Club members donate £200 annually (£16.67 per month) and businesses donate £500 annually.

Leave a legacy: By leaving a legacy to the North Hampshire Medical Fund, you are helping to make sure that we can continue to support Basingstoke, Winchester and Andover hospitals through purchasing specialist equipment.

Set yourself a challenge: From marathons to cake sales, there are so many different ways you can fundraise for us!

Volunteer: If you could volunteer your time for us, we would love to hear from you. The time you give really does matter and it can be as little or as much as you choose.
